

Sometimes I Wonder

Sometimes I sit and Wonder;

Why is the Earth so round?
Or are there aliens roaming around?

How do astronauts drink in space,
Without getting water all over their face?

How bright is the sun from the moon,
and will we get to Mars soon?

How quickly does a rocket go
Or is there a planet covered in snow?

How does Saturn's rings stay in place
And what is beyond space?

How small would the earth look like from the Moon
Or could we one day all be doomed???
